## SELECTED PUBLICATIONS ON SMALL FARMS

by

Elizabeth C. Foushee and Richard D. Duvick

This compilation is intended to give the user an idea of what materials are available on the subject of small farm management. It covers a number of basic topics, and is the result of a survey taken of the states of the North Central Region. Although not a complete listing, this bibliography is up-to-date (as of September 1980) and accurate according to the information provided by the various issuing agencies.

To obtain copies of the titles listed here, write directly to the issuing state (USDA is treated as a state for indexing purposes). Addresses are given on page 3. Remember that there may be a charge for out-of-state publications, especially USDA publications. Include instructions for billing, or a price inquiry, with any request for publications.

This compilation is arranged in two sections. The first is a listing of all titles by state. The second is a listing of all titles by subject. Titles are listed under as many different headings as are appropriate. The table of contents is on page 5.

There are also correspondence courses offered through The Pennsylvania State University that may be helpful to some individuals. To find out what courses are offered, write to:
